

Sonia Herraiz, Ph.D.- Biosketch

Dr. Sonia Herraiz is a full-time scientist at IVI Foundation leading the Ovarian rejuvenation and Fertility Preservation research group, visiting scholar at Stanford University Medical School, and part of the Fertility Preservation Unit at La Fe University Hospital in Valencia.

Her scientific career is focused in the achievement of ovarian rejuvenation by several approaches like the autologous stem cell transplantation or the ovarian fragmentation. She has authored over 20 peer-reviewed scientific papers and book chapters in international journals. She has been prized by the Spanish Fertility Society in 2016 and by the Society of Reproductive Investigation in 2018. Furthermore, is Professor in the Master's Degree in Biotechnology of Assisted Human Reproduction (University of Valencia, UV) since 2016.
